

C Programming Lab Assignments

List of Problem Statements and Submission Dates

S.No	Problem Statement	Submission Date
1	Arithmetic Operations on Different Data Types Write a C program to perform arithmetic operations (+, -, *, /, %) on different data types (int, float, double, char) and display the results in a neatly formatted manner.	08/10/2026
2	Student Marks Processing Write a C program to read a student's roll number and marks in five subjects using scanf(). Calculate the total marks, average and percentage, and display the results in a formatted manner.	08/10/2026
3	Menu-Driven Calculator using switch Write a menu-driven C program using a switch statement that offers the following options: Addition, Subtraction, Multiplication, Division and Modulus. For each operation, read a new set of inputs from the keyboard and display the formatted output. Limit fractional results to two decimal places wherever applicable.	08/10/2026
4	Largest and Smallest of Three Numbers Write a C program to find the largest and smallest of three numbers using conditional statements, and display the results in a formatted manner.	08/10/2026
5	Driving Licence Eligibility Check Write a C program to determine whether a candidate is eligible for a driving licence by checking the following criteria: 1. The candidate's nationality must be Indian. 2. The candidate's age must be 18 years or above. 3. The candidate must have passed the driving test. 4. The candidate must have paid the DL processing fee. The criteria must be verified in the order given above. If any criterion is not met, the program should display the reason and must not check the remaining criteria.	08/10/2026
